

Your Telematics System Can Now Join You In the Field!

Near Me is designed to work with telematics services on the i2™ Network.

Near Me is a powerful mobile application for field operations that you can download to your iPhone®, Blackberry® or Android™ Smart Phone. Near Me gives you current information that you need while on the move. Having up-to-date information about your fleet allows you to make better decisions that can save your organization time and money.

Locate:

The mapping and GeoZone™ module quickly locates the equipment near you. A geographic overview with status and alarm condition allows you to view the entire fleet relative to your current position. Touch any equipment icon to reveal its name and relative distance, with a hotlink to status details.

Select:

Narrow down to the ones closest to you within a specific radius. Zoom in and out, pan or search by equipment name or number.

View:

Get up-to-date alarm information, fault codes and other equipment parameters (run hours, fuel amount, battery level, SAE J1939 data, etc.).
